SHASHWAT JAIN

B.TECH AIML | CGPA: 3.41/4 (Top 10% in my batch) | NMIMS MPSTME, SHIRPUR

SKILLS

Generative AI
RAG, LangChain, FAISS, Prompt Engineering, Quantization

Machine Learning & DL
PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy

Programming & Databases
Python, C++, MySQL, MongoDB

Tools & Visualization
Git, GitHub, Streamlit, FastAPI, Power BI, Tableau

Platforms & Other Tools
Windows, Linux, AutoCAD, TinkerCAD, Cisco Packet Tracer, Blender

ACHIEVEMENTS

ANRF AISEHack 2.0 | 2026
Final-round participant; 4th on the Kaggle leaderboard.

HackRx 6.0 | 2025
Reached Round 4 (Pre-Finals).

Innovent | 2025
District-level idea competition participant, NMIMS.

Vice Chair | ACM Student Chapter
Supported technical events and student knowledge-sharing.

EDUCATION

B.Tech, AI & Machine Learning
SVKM'S NMIMS MPSTME, Shirpur
Jul 2023 - Present | 2027 Batch
CGPA: 3.41/4.0

Class XII - ICSE
Mercy Memorial School
Apr 2022 - Apr 2023 | **80%**

Class X - ICSE
Mercy Memorial School
Apr 2020 - Apr 2021 | **88.5%**

PROFESSIONAL OVERVIEW

B.Tech AI & ML student graduating in 2027, with hands-on experience in Exploratory Data Analysis, Model building and evaluating, Deep learning & LLMs. Passionate about building useful AI systems and evaluating model quality, memory use and inference efficiency. Seeking an Internship that would allow me to build and test ML models.

PROJECTS

LLM Post-Training Quantization

Capstone | Python, PyTorch, CUDA, Triton, NVML

• Benchmarked FP4, NF4 and NVFP4 against 16-bit baselines across five LLM families: Mistral, Llama, Qwen, Phi and Gemma.

• Evaluated quality, GPU memory, latency, throughput and GPU energy; profiled execution paths and repeated probes to assess workload-dependent trade-offs.

Multilingual RAG Platform

Sep 2025 - Nov 2025 | LangChain, FAISS

• Built a multilingual chatbot that retrieves document context with FAISS and generates document-grounded responses through LangChain.

• Implemented chunking, embeddings, query classification and prompt engineering for relevant retrieval and grounded answer generation.

VoxCeleb Speaker Identification

Aug 2025 - Oct 2025 | PyTorch, CNN

• Built an end-to-end speaker identification system on VoxCeleb dataset.

• Designed a VGG16-Lite-inspired 2D CNN with batch normalization & dropout on augmented Mel Spectograms.

ESG Risk Analysis Dashboard

Power BI, Data Modeling, Interactive Visualization

• Built English and Marathi dashboards to analyze village-level ESG survey results, risk indices and environmental, social and governance scores.

• Enabled filtering by village, focus group and ESG dimension, with question-level analysis and response counts to investigate sources of risk.

CERTIFICATIONS

Deep Learning - IIT Ropar
NPTEL, Elite Category

Machine Learning Using Python
NPTEL (SWAYAM)
